### Languages

English – Native  
German – Basic  
Swedish – Basic

## Summary

Dedicated and detail-oriented full-stack JavaScript developer. I'm a South African – German living in Stockholm, with a passion for coding & sustainable solutions. Eager to learn new technical and design skills. Varied background, with strong analytical and research skills, as I have worked for some years in the retail industry, and have an educational background in biology and ecology.

## Education & training

### Full-stack JavaScript – School of Applied Technology

September 2022 – December 2022

Intensive three-month training program for full-stack software development. With a focus on TDD, mob programming, and applied learning.

### Masters of Science – University of the Witwatersrand

January 2017 – July 2019

Masters by research dissertation focusing on plant ecology and evolution.

### Bachelor of Science with Honours – University of the Witwatersrand

February 2013 – December 2016

## Work experience

### Software developer consultant – Applied Technology – Stockholm

January 2023 – ongoing

Furthering my TypeScript skills with full-stack internal projects

### Research analyst – Impaakt – remote, freelance

January 2021 – May 2022

Using published information to research and report how businesses impact the planet and society.

### Store supervisor – Gone Outdoor Supply Co. – Johannesburg

August 2020 – October 2021

Responsible for the sales, team training & operations of the store. Conducted sales analyses and inventory counts to assess targets and purchasing trends.

### Store assistant – Gone Outdoor Supply Co.

November 2019 – July 2020

### Teaching assistant – University of the Witwatersrand – Johannesburg

January 2016 – July 2019

Teaching assistant to BSc biology undergraduate students, courses included biostatistics and R programming.
